In its 23rd year "The Environmental Health Connection" is an annual event that explores the delicate link between the modern world and its effects on our health. Sponsored as a community service by the American Environmental Health Foundation, The Public Session is held in conjunction with our Twenty-sixth Annual International Symposium on Man and His Environment in Health and Disease. The international medical conference is attended by physicians and scientists from around the world. The Public Session addresses the effects of present-day environmental factors on the human body. The primary purpose of the Public Session is to increase public awareness.
